

Help us Pilot the ENVISAGE-SP Program

ENabling VISions And Growing Expectations for Service Providers

WHAT IS IT ALL ABOUT?

WHAT IS INVOLVED?

The ENVISAGE-SP Program, co-developed by health services researchers, parents, and pediatric service providers introduces service providers to a set of modern concepts, which endorse a holistic, strengths-based, function-promoting, family-centred approach to children's health and development. Through a series of five workshops, ENVISAGE-SP offers ideas and provides tools/resources to apply these concepts in everyday practice with families.

- Review five ENVISAGE-SP online workshop materials
- Complete online surveys providing feedback on the acceptability, appropriateness, feasibility, usability, and utility of the ENVISAGE-SP program
- Participate in an optional online interview to help us develop the program further

WHO CAN PARTICIPATE?

- Service providers who work with children with neurodevelopmental disabilities in Canada and Australia.
