

## NEW ONLINE SURVEY FOR CANADIAN PARENTS OF CHILDREN WITH CEREBRAL PALSY (CP)

Are you the parent or guardian of a Canadian child with CP who has complex communication needs (i.e., limited motor and speech function)?

**If yes, we want to hear from you!**

Photo source: ilstockphoto.com

We are recruiting Canadian parents/guardians of children with CP and complex communication needs to complete an online survey to share your experiences and needs related to assessment of children's language comprehension.

We also want to introduce you to a new assessment tool called the Computer-Based Instrument for Low Motor Language Testing (C-BiLLT), which is a novel tool that uses alternative access methods to assess language comprehension in children with CP.

The survey is anonymous and will take no more than 30 minutes to complete.

To access the survey, please use this link:
